

Operation Tyre

By: Kashia Samms

Date: 15/5/15

When I'm in the garden I like playing with the tyre. I try to pick it up but it is too heavy for me. I really want to wheel it up to the top of the platform. It's really hard but I stay focused and determined and keep on trying to lift the tyre. I don't ask for any help.

I take a closer look. How am I going to do this? I'll try again.

I have done it. I lifted it and rolled it to the platform area. Only three steps to get to the top.

Nearly at the top now

Oh no, it starts to roll back on me, I put my foot at the bottom to stop it from rolling.

Oh no the tyre is falling what should I do? I know I'll move to the side and rest it on my body to stop it from falling.

So close now.

I did it! Operation tyre completed!

What did I learn?

This was a good lesson in problem solving, working out how to lift the tyre. I used my gross motor skills to lift, balance, and push and roll the tyre.
